

CERI honored with Top-Rated Nonprofit Award

Posted Dec 10, 2018 at 4:21 PM

Cancer Education and Research Institute, formerly Cancer Research Simplified, recently announced it received the 2018 Top-Rated Nonprofit Award by GreatNonprofits, a provider of user reviews of charities and nonprofits.

CERI provides multi-languages, simplified cancer education aimed at giving a better understanding of the disease, treatment methods, early screening and cancer prevention methods, and providing guidance on centers and hospitals specifically focusing on their disease.

“We couldn’t be more excited to be named a Top-Rated Nonprofit for the fifth time in a row, and are deeply honored to see that we make a true difference in people’s lives” said Ayguen Sahin, CEO and founder of CERI. “We are proud of our accomplishments this year, in particular that our educational programs have reached 2.2 million people worldwide from 192 countries.”

“Our educational programs make a real difference in people’s lives. We have received a remarkable 91.5 percent approval rate of our cancer type-specific and general cancer awareness lectures in Massachusetts and overseas. We have seen that more than 64 percent of long-term, chronic cancer patients learned something about their disease through our lectures they didn’t know before. This was very important for us to see as it proved exactly our point of founding this organization. We are committed to make cancer understandable for everyone.” said Sahin.

The award was based on the number of positive reviews that CERI received. People posted their personal experience with the nonprofit. Cancer Education and Research Institute earned this award with a rating of 5 out of 5 stars.

“Cancer Education and Research Institute is a great example of a nonprofit making a real difference in their community,” said Perla Ni, CEO of GreatNonprofits. “Their award is well-deserved recognition not only of their work, but the tremendous support they receive, as shown by the many outstanding reviews they have received from people who have direct experience working with Cancer Education and Research Institute.”
