Journal of Simplified Cancer Research's Inaugural Issue Published Today!

Somerville, MA....The first issue of the *Journal of Simplified Cancer Research (JSCR)*, the official journal of Cancer Research Simplified (www.cancerresearchsimplified.org) is being published today. The inaugural issue of a monthly online journal that tackles important cancer topics in an academic way without the overuse of technical jargon thus allowing layman to get a better understanding of cancer by distilling complex writing to everyday written English, complements the many other educational outlets this rapidly-growing cancer organization offers to the public.

“This highly-anticipated journal brings even more insight into how cancer research can be simplified for patients and their loved ones,” says CEO and founder Dr. Ayguen Sahin. “We are very proud of our research department staff here at Cancer Research Simplified (CRS), joining us from world-renowned universities, such as Yale, Harvard, and Princeton. The CRS team’s expertise and scientific backgrounds allows them to translate complicated science into simplified articles that everyone can understand. Not an easy task for us scientists, but this is exactly why we’re here – bringing scientific research down to people, and thus, connecting the two “worlds” of cancer scientists and cancer patients.”

Written by CRS researchers Dr. Claudia Bertuccio, Ms. Elana Meer, and Dr. Rocco Palumbo, the issue is jam-packed with both interesting and informative insights into the steps of clinical trials (“All You Need To Know About Clinical Trials, Part I”), modern cancer diagnostic methods (“Cancer Diagnosis Methods”), psychology and cancer (“Psychology and Cancer, Part I”), as well as a new Phase III drug that shows great promise in treating pancreatic cancer (“Eleison Pharmaceuticals Starts Phase III Clinical Trial for Glufosfamide Treatment”).

The premiere issue is available online at www.cancerresearchsimplified.org at \$5 per issue download.

About Cancer Research Simplified:

Cancer Research Simplified™ is a non-profit organization, committed to providing ‘simplified’ information resources to cancer patients about their disease, the latest cancer

research, and cancer institutes and hospitals worldwide that provide specialized cancer care and specific targeted therapy methods. In addition, we provide scholarships for high school students worldwide to perform research activities at renowned cancer research institutions around the world.

Mission Statement

Making cancer research understandable for everyone. Providing scholarships for young students worldwide to encourage careers in cancer research.

Vision

By providing cancer patients with information about their disease, up-to-date research, and specialized cancer treatment institutes, we can bridge the gap between cancer patients and cancer-treatment professionals and ease the burden on cancer patients by making it easy to find the best possible care.
